Template for comments and secretariat observations

Date: 2013/10/08	Document: CWA_XBRL_WI001-4 (E)	Project: **XBRL**

MB/ NC[1]	**Line number** (e.g. 17)	**Clause/ Subclause** (e.g. 3.1)	**Paragraph/ Figure/ Table/** (e.g. Table 1)	**Type of comment[2]**	**Comments**	**Proposed change**	**Observations of the secretariat**
EBA		Rule 2.26 - @decimals		ed	"The XBRL processors use interval arithmetic for validation." should be reworded, as it is confusing/misleading. Interval arithmetic is not really a feature of the XBRL processors themselves, but of the particular taxonomies (implemented using XBRL formula linkbases and xpath functions).	Suggest perhaps "Taxonomies following the European Taxonomy Architecture will/may use interval arithmetic for validation".	
EBA		Rule 2.36 - Currencies		ed	Typo: “Amounts that *are* reported”
